PROFILE

Eager student proficient in graphic design, IoT, data analytics, cybersecurity, Digital marketing and machine learning. Skilled in problem-solving and innovation. Seeking to apply and expand skills in IOT to contribute effectively in tech-driven environments.

PROJECTS

- **SMART BIN**

  Smartbin project automates lid movement, alerts users when full via messaging, and enables inter-bin communication.

- **FACE RECOGNITION CAMERA**

  Face Recognition Camera project combines surveillance with face recognition, greets individuals by name, and stores their visit details

- **SMART CAR**

  Smart Car project integrates camera surveillance with automatic object detection as a rover, with future plans to upgrade it into a Smart Home Rover.
